

Thank you for being interested. We will assist you the best we can.  
Should you have any questions, please email us at [info@dia-pure.co.za](mailto:info@dia-pure.co.za).

## HOW DOES DIA PAD **SPONSORSHIP** WORK?

Depending on your available funding, we have several options to choose from. Once you have selected an option, we can assist through the NGOs, educational institutions or social workers to allocate donations of reusable sanitary pads to the needy girls/ schools/ communities.

We distribute the pads through the relevant organisation (NGO) or work directly with the beneficiaries and distribute them from our warehouse. Sponsors are provided relevant feedback on distribution, followed up with an efficacy report.

We also offer a DIA representative service where we assist with the delivery and distribution of the pads and hold a 20 - 30 minute introductory session with the DIA beneficiaries. This has proven to be of great value to the girls as they can ask direct questions, and we can provide guidance. Let us know if you require this service for us to discuss the logistics.

Please inform us if you require further assistance.

## HOW DO DIA PADS **BENEFIT** A NEEDY GIRL?

- + The beneficiary can save money! The monthly household expenses for single-use sanitary pads add up.
- + DIA reusable pads benefit feminine health and well-being. DIA is made from bamboo, a hypoallergenic natural product. The antibacterial and anti-microbial properties help reduce odour-causing bacteria and fungi. The pad is breathable, highly absorbent and leakproof.
- + DIA empowers the girls - they receive a superior-quality sanitary product and can effectively cope with the challenges of menstruation. They can focus on their studies and develop better feminine hygiene practices. The FLOW CHART TRACKING SHEET is a simple way to plan their menstrual cycle and prepare.
- + They become aware of how small behavioural changes can collectively contribute positively to the environment.
